Thanks Matt, will Mike fold in our input to address the inquiry or do they expect us to do so separately?

Phil,

I've emailed Mary to verify if she or any others in her office have received a copy of our last CC/ML letter. No response as of yet. I'm attaching an updated timeline of recent correspondence on this topic. I cc'd you on Russell's response to Mike Tillman's inquiry regarding our response. I think that might have covered what you were looking for? I will note that we asked ADEQ to respond by July 1 with a course of action.

Matt

Phil's group is doing a status update. I don't think anything has moved since our meeting with them, ADEQ does not believe they should adopt UAA. I don't recall receiving anything else from ADEQ.

Jane and Claudia, please your staffs work together on a response that touches on both the UAA (limited aquatic life use designation) and permitting issues. We also need to address the allegation of 85 MGD of black liquor to LA. If this is not correct, either in quantity or with respect to hydrology of the area (forget the name of lake that Coffee Crk empties into. Thanks,

Miguel

GEORGIA PACIFIC PAPER MILL

Marylee Orr

to: Lawrence Starfield

06/18/2010 11:15 AM

Larry

I have an important question

ADEQ submitted a permit to EPA. The Permit is for Georgia Pacific Paper Mill in Crossett , Ark.

Couple of years ago ADEQ refused EPA's order to redesignate Coffee Creek

UAA they are using is flawed and may be done in 1954.

ADEQ refuses to redesignate coffee creek.

EPA employee in the renewal application mentioned that ADEQ could continue to dump 85 million gallons of black liquor to Louisiana a day and ADEQ gave them permission to ignore the user attainability guide for another five years.

People are very upset about this.

Can your people look into this?

Folks are thinking EPA has not done their job.

THANKS SO MUCH

marylee
